Summary

Engineering undergraduate and aspiring **Data Analyst / Python Developer** with hands-on experience in **Python, Django, SQL, MySQL, and Data Analytics**. Skilled in **Exploratory Data Analysis (EDA)**, **data preprocessing**, **SQL optimization**, and building **data-driven applications**. Experienced in **SDLC-based development** with exposure to **Machine Learning** using **Scikit-learn**.

Education

2022 – Present	Bachelor of Technology (Computer Science) , Dr. Hari Singh Gour University	CGPA: 7.21 / 10.0
2022	Class XII (CBSE)	71.2%
2020	Class X (CBSE)	71.2%

Experience

Orange Data Tech

May 2024 – June 2024

Python / Django Technical Intern — GitHub

Indore, India

- Designed and developed a **data-driven CRM system** using **Python, Django, and MySQL**, supporting complete **SDLC phases**.
- Optimized complex **SQL / T-SQL queries**, reducing data retrieval time by approximately **30%**.
- Implemented scalable backend logic and **CRUD operations** using **Django ORM**.
- Built responsive user interfaces using **HTML and CSS** to improve usability.
- Prepared **technical specifications, requirement documents, and functional documentation**.

Projects

Sales Performance Analysis | Python, Pandas, Matplotlib, Seaborn GitHub

2025

- Analyzed **9,000+ sales transactions** using **Python** and **Pandas**, performing data cleaning and preprocessing on **20+ features**.
- Conducted **Exploratory Data Analysis (EDA)** across **3 categories** and **15+ sub-categories** to evaluate sales and profitability.
- Identified **top-performing products** and **high-margin customer segments** to support data-driven insights.
- Performed **time-series analysis** on **4 years of data** and created **10+ visualizations** using Matplotlib and Seaborn.

Student Result Analyzer | Python, Pandas, Matplotlib GitHub

2024

- Processed and analyzed **5,000+ student records** using **Python** and **Pandas**.
- Automated academic result analysis with approximately **99% accuracy**.
- Reduced execution time by nearly **45%** through optimized data handling.
- Visualized insights using **Matplotlib** with **CSV-based storage**.

CreditWise Loan System (ML Project) | Python, Pandas, NumPy, Scikit-learn

2025

- Built a **supervised ML pipeline** to predict **loan approval** using binary classification on **1,000+ records**.
- Performed **EDA** on **10+ features** and applied **data preprocessing** with an **80:20 train-test split**.
- Trained and evaluated **KNN, Logistic Regression, and Naive Bayes** models using **Scikit-learn**.
- Achieved up to **86–88% accuracy** based on **Precision, Recall, and F1-Score**.

Technical Skills

Programming Languages: Python, SQL, T-SQL

Frameworks & Libraries: Django, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Data Analytics & ML: Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Feature Engineering, Statistical Analysis, Time-Series Analysis, Supervised Learning, Model Evaluation

Databases: MySQL, SQL

Tools: Git, GitHub, Visual Studio Code, IntelliJ IDEA, n8n

Methodologies: SDLC, Requirement Analysis, Unit Testing, Technical Documentation
